The Distribution Desk

26 Lanes. One Client Record.

This packet combines the original two-page event press sheet with the complete SACDLA distribution roster, prepared channel copy and the full 33-entry source catalog audit.

No campaign distribution has occurred. Prepared copy and assets remain subject to creative review, account authority, destination eligibility and release approval. Existing external event drafts and other campaigns remain unchanged.

Counting Basis

Count distinct destinations and separately named native delivery formats; do not count assets, audience handles, aggregates or repeated C labels. The 33-entry source catalog is audited in full, not treated as 33 active accounts.

25 prepared candidates plus one ineligible training calendar. Eventbrite is an existing unpublished draft with registration integration held. Repeated C labels and aggregate press/calendar rows are deduplicated. Native Facebook Event, feed, Reel, Instagram Story, LinkedIn video and YouTube Shorts formats remain distinct.

The Source of Record

[Open Julie's Existing SACDLA Workbook](#)

The original Good Creative Media campaign-management system and source spreadsheet were created by Julie Good. This separate original campaign uses the existing GCM > SACDLA client and its own native IMC campaign record.

[Open the Full Live Press Sheet](#)

Read Each Lane

Each page identifies its purpose, target, account/access route, prepared title and copy, exact registration CTA, matching original assets and next release step. No account grant, editorial acceptance or publication is inferred from a prepared draft.

Official directory links establish organizational association, including group URLs where applicable. They do not prove current posting activity, reach, permission, endorsement, or that a typed name will resolve to a Facebook/LinkedIn tag. Three first-party HTTP rechecks returned 403; their same-day previously verified source records are retained and distinguished in the JSON.

TexasBarCLE's legacy Twitter hashbang link was corrected to <https://x.com/texasbarcle> from the actual official-site anchor. The existing client Google Sheet was corrected too.

No messages to these 20 target organizations have been sent. Facebook/Instagram account-access requests to SACDLA are separate administrative actions. No campaign distribution occurred.
